I've worked in the electricity distribution sector for the last years, where I developed and put into practice a diverse skill set, including team work, leading, planning and problem solving. I have also gained experience working in emergency situations under stress.

Recently, I've switched gears and dove headfirst into web development, focusing mainly on full stack MERN. I'm also exploring the fascinating world of AI.

WORK EXPERIENCE

2022 – Present > Freelance

Electrician

Providing electrical installation, repair and maintenance services for residential and commercial customers. As well as adaptation of pillars and facilities according to electrical codes and standards (Edenor/Edesur), for electrical certification to enabling new installations.

2013 – 2020 > **Edenor** - Electricity distribution company

Technical Operations Supervisor

Direction and supervision of work crews for repairing failures in low (220-380 V) and medium voltage (13,200 V). 30 people in charge. The main objective was to maintain and provide service in departments of San Isidro and Vicente López (+220.000 clients).

EDUCATION

UBA (University of Buenos Aires) - Data Mining and Machine Learning Course

Most of the course was based on the book "An Introduction to Statistical Learning: with Applications in R" (by James, Tibshirani, Hastie, Witten). Course duration: one semester.

UTN (Universidad Tecnológica Nacional) - Management in electricity distribution companies

Young Professionals program jointly dictated by Edenor and the UTN (Universidad Tecnológica Nacional). Focused on both technical and management aspects.

UBA (University of Buenos Aires)

Industrial Engineering.
